Life Is On

Schneider
Electric

Chill out knowing you're all protected.

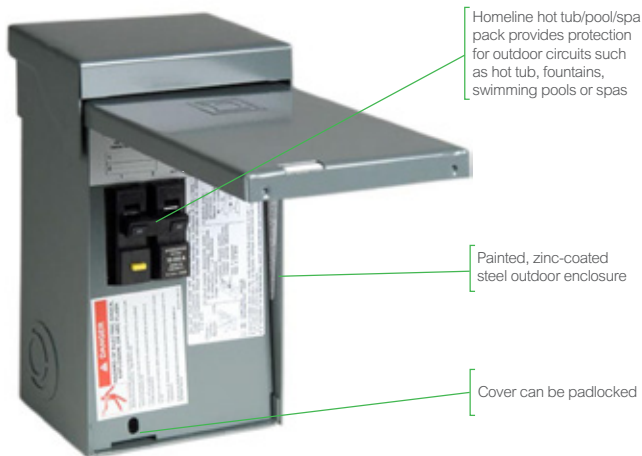

Schneider Electric™ spa pack ground fault circuit interrupters (GFI) for hot tubs, pools and spas is the last word in personal safety.

Your pool or hot tub is a place for you to put your worries behind you and relax. Ensuring that you have the right electrical components is paramount to your safety, and selecting a spa pack GFI for a hot tub, pool or spa has never been easier.

Schneider Electric offers hot tub/pool/spa electrical protection, in outdoor rated enclosures. Produced either in robust steel or in a corrosion proof plastic, these enclosures were designed specifically to withstand the highs and lows of the Canadian weather.

Our spa packs include a factory installed 50 A ground fault circuit interrupter. The 2-pole ground fault circuit interrupter provides ground fault, overload and overcurrent protection.

So take some time out and relax, you deserve it.

Relax, we've taken care of it.

Selecting a spa pack loadcentre for a hot tub, pool or spa has never been easier.
